(*) CROSSTRADE: Due to the strong growth of global trade, Nadal Forwarding has a division 100% dedicated to providing Solutions to Triangular Operations (Cross Trade). This division offers solutions for all those transport operations with a country of origin and destination different from that of the originator. We solve all operations with personnel specialized in document management and regulations between the different countries in which the transport takes place, guaranteeing the confidentiality of data between buyer and seller, taking charge of all communication, document management and door-to-door transport of the operation.

(**) SIC: The SIC division of Nadal Forwarding offers outsourcing solutions, with specialized personnel and integration in its logistics chain with different degrees of management, being able to act from the moment the order originates until the final delivery to the recipient. We can prepare the necessary documentation, invoices, delivery notes, etc. coordinate the entire organization of transport and customs clearance, as well as the necessary inspections, delivery of documents to the bank or destination, and so on. We act and integrate ourselves to the extent needed by the exporter or importer at any time, being able to outsource all logistics 100%.
